

ProLogue One integrated amplifier

PrimaLuna[®] ProLogue One

- Made by hand with the finest point-to-point wiring and workmanship equal to—or better than—any product you can buy at any price.
- SoftStart™ circuitry and advanced conservative design provides extended tube life.
- EL 34 Output tubes, 35wpc. Quick-release tube cage included.
- Premium parts featuring fully-vented, ceramic, tube sockets; Nichicon and Realcap capacitors; WBT-style speaker terminals; ALPS volume control; and gold-plated input jacks.
- Adaptive AutoBias™ (a PrimaLuna exclusive) reduces distortion 40% to 50%. No need for matched tubes or bias adjustments.
- Hand-rubbed, high gloss finish with black or silver faceplate.

“Lustily, heartily, and enthusiastically... recommended.”

— Art Dudley, *Stereophile*, February 2005

“How does it sound? Bitchin’, that’s how it sounds.”

— Jeff Dorgay, *The Absolute Sound*, December 2004

“It’s this sort of quality you’d expect from a much more expensive amplifier.”

— Dominic Todd, *Hi-Fi World*, U.K., August 2004

“PrimaLuna ProLogue One is now my ‘affordable reference’ amplifier. ... to my ears, no equals at its retail price ...”

— Ken Kessler, *Hi-Fi News*, U.K., July 2004

“It has become absolutely needless to say that we highly recommend this amplifier to everyone looking for first-class sound at an affordable price.”

— Claudio Checchi, *Audio Review*, Italy, March 2004
