

# PrimaLuna<sup>®</sup> ProLogue Two

The ultimate integrated amp in its class

For just a little more than the ProLogue One, with greater power and even higher performance from the following upgrades:

- **KT88 Output Tubes.** We use the current production copy of the legendary British Genalex KT88. The tube simply sounds spectacular, offering tremendous body and punch while maintaining the warmth and humanity you expect from an all-tube amplifier.
- **Fast Recovery Diodes.** The result is increased definition, detail, and control, especially during complex musical passages.
- **Hand-rubbed, high gloss finish** with black or silver faceplate and quick-release tube cage.
- **Solen capacitors made in France** provide a richer midband and more life-like clarity.

***"The PrimaLuna ProLogue Two garners my strongest recommendation. It's not merely a great tube amp, but a great amp, period."***

— Ed Kobesky, *Positive Feedback Online*, March 2005

***"I loved it, and strongly recommend you try one at the earliest opportunity."***

— Jim Hughes, *Hi-Fi+*, U.K., November 2004

***"One of the best tube amps I have ever heard, irrespective of cost."***

— Paris Kotsis, *Sound and Vision*, Greece, December 2004
