Model and technical specifications are subject to change without prior notice.

Crystal, Natural, completely translucent gemstone. Very exclusive champagne. Classy glass ware. The most sophisticated and user-friendly audio & video cable line on the planet. Crystal Cable.

Numerous awards. Distribution in 35 countries. All this in our first two years. There's good reason for it, too. Based on aerospace and military developments, we employ hi-tech materials like Kapton and Peek for insulation.

We rely exclusively on advanced in-house silver-gold metallurgy and perfect terminations from custom machinery. Repeatable, consistent, flawless every time. Crystal Cables are ultra-thin, ultra flexible and have the highest RFI and EMI rejection ratio on the market. The proliferation of wireless communications makes this essential. While other companies bulk up their cables with paralleled shields and ever more complex layers, Crystal Cables shed all such redundancies by using superior materials in the first place. Doing things right means: less becomes more. Less mass, less dielectric, less plastic, less resonance. So much less equals one very large more: more uncorrupted signal, more music.

Backed up by R&D in Europe's most advanced testing laboratory for cables, Crystal Cable may be new but we're based on solid science, advanced engineering and uncompromised execution. Besides sounding better and being far easier to integrate into the living or media room environment, Crystal Cables also look amazingly aesthetic.

Crystal Cable is audio jewellery with extraordinary sound and exceptional value.

INTERCONNECT

Piccolo
Micro
Standard
Reference

Available with RCA, XLR, MiniJack, TAC-5 and DIN connectors

POWER

Micro
Standard
Reference

Available with EUR, UK, US and AU/NZ wall plugs
and IEC 10A and 16A connectors
(Power handling: 3800 Watt and up)

DIGITAL

Digit

Available with RCA, XLR and BNC connectors

FireWire

Available with 4 or 6 pin connectors

SPEAKER

Micro
Standard
Reference

Splitters: spade or banana connectors
Integrated Jumpers are also available

(Power handling: 16A and up)

VIDEO

HDMI and DVI-D cables

Cinemax: Multichannel cable with
6 audio and 1 data connection

Component-3: available with RCA
or BNC connectors

Component-5: available with RCA, BNC
or SCART connectors
