Sensitivity: 94 dB
Frequency Response: 55Hz to 22kHz
Finishes: Wilsongloss
Dimensions:
Height: 12.5 inches
Width: 20 inches
Depth: 16 inches
Product Weight: 70 lbs
Shipping Weight: 95 lbs.

WATCH Surround Specifications

Impedance: 8 Ohms
Sensitivity: 89 dB
Frequency Response: 45Hz to 22kHz
Finishes: Wilsongloss
Dimensions:
Height: 22.5 inches
Width at Top: 9.5 inches
Width at Bottom: 5 inches
Depth Un-mounted: 8 inches
Depth Mounted: 10.5 inches
Product Weight (uncrated): 50 lbs.
Universal Mount Weight: 15 lbs.

WATCH Dog Specifications

Frequency Response: 20-30/150Hz Adjustable
Low Pass Filter: 12dB/octave or 18dB/octave
High Pass Filter: 6dB/octave; or 12dB/octave
Phase: Continuously variable from 0-180 degrees
Power: 400 Watts
Drive Unit: 12 inch long throw
Dimensions:
Height: 27 1/2 inches
Width: 18 inches
Depth: 27 1/2 inches (add 3 1/2 inches for grill & heatsink)
Product Weight: 283 lbs

THE WATCH SYSTEM

A state-of-the-art loudspeaker system designed to take advantage of today's home theatre sources

Wilson Audio loudspeakers have long played a vital role in the motion picture industry as **reference monitors** in recording studios such as LucasFilm's Skywalker Ranch, Pixar Studios, MGM, Walt Disney Imagineering, and many others. From the knowledge gained in these venues, Wilson Audio has created the WATCH™ system--
Wilson Audio Theater Comes Home.

For the first time, your home theater can provide the same degree of **nuance, detail and explosive impact** that Academy Award® winning sound engineers and composers experience when they create their soundtracks in the studio.

The WATCH system comprises three main elements, each as beautiful to behold as they are to listen to. **The WATCH Center Channel** features our exclusive Group Delay Correction™ technology found in the Watt/Puppy Series 6®, MAXX® and X-1 Grand SLAMM®. When matched with Wilson Audio loudspeakers, it creates a seamless and time coherent soundstage of dialogue and digital surround effects.

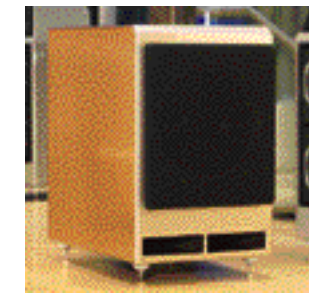

UNCOMPROMISED DESIGN

The WATCH surround speakers offer full-range **dynamic impact and resolution** consistent with other Wilson Products. The speakers are oriented toward the listening area by means of a custom mount. Made from a proprietary material, the mount also serves to reduce significantly the colorations typical of wall-mounted speakers.

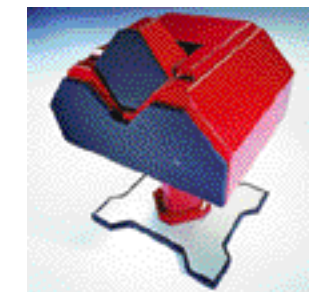

WATCH SURROUND

The third Watch component is the WATCH Dog™ subwoofer. Powered by a **400 watt Richard Marsh-designed amplifier**, the WATCH Dog includes a powerfully versatile Control Panel enabling optimized setup in a wide variety of systems and rooms. The WATCH Dog can be used as Low Frequency Effects (LFE) sub, or--with the flip of a switch--as a L+R subwoofer for music.

WATCH DOG

For over a quarter century Wilson Audio has built audio products uncompromised in design, materials and craftsmanship. This passionate pursuit of the best has been recognized by the leading audio engineers in the motion picture industry. It is now yours to enjoy as the WATCH system **redefines state-of-the-art in home theater.**
